EXPERIENCE

Bytehint - MERN Stack Intern

Nov 2025 - Feb 2026

- Converted complex Figma workflows into production-ready Next.js interfaces with strong responsiveness, accessibility, and cross-device consistency.
- Developed and optimized Electron-based desktop application features, improving rendering performance and overall user experience.
- Delivered frontend and backend integrations for production systems serving over 100,000 users across multiple application modules.

Code Help - Full Stack Developer Intern

Aug 2025 - Nov 2025

- Contributed to the frontend modernization of a large-scale edtech platform using Next.js, TypeScript, and modern frontend architecture patterns.
- Built reusable UI systems and scalable component libraries that accelerated feature development across multiple product areas.
- Integrated GraphQL services using Apollo Client and optimized query strategies to improve application responsiveness and reduce unnecessary network requests.

Astraea Solutions – Product Tech Intern

Jun 2025 – Aug 2025

- Developed platform features for a CyberRange training environment used for cybersecurity education and hands-on simulation exercises.
- Designed scalable frontend architectures and reusable data-driven interfaces across training and assessment modules.

Arkcore - Frontend Developer Intern

APR 2025 - AUG 2025

- Worked within a small engineering team to build and scale a SaaS platform frontend using Next.js and Tailwind CSS.
- Built and deployed the company's marketing website using Next.js and Strapi CMS, including dynamic content management and SEO-focused architecture.

PROJECTS

GearOne Mobile App

Playstore [Link](#)

- Architected and built the complete product ecosystem including a React Native mobile application, backend services, admin dashboard, and operational management tools.
- Designed authentication, order management, payment processing, and business workflow systems supporting day-to-day platform operations.
- Integrated Razorpay payment infrastructure and managed Android and iOS deployment pipelines from development through production release.

LocalGov – AI-powered Legal Explainer

Live

- Built a platform that simplifies complex government policies and legal documents into accessible explanations using modern AI models.
- Developed server-rendered application architecture and caching systems that reduced operational costs by approximately 30%.

MetaMorpher – Web-based Multimedia Conversion Tool

Live

- Engineered a client-side multimedia conversion platform capable of processing images, videos, and audio files directly within the browser.
- Leveraged FFmpeg.wasm to eliminate server-side file processing requirements and improve user privacy.

SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript, React Native, Tailwind CSS, GSAP, Framer Motion, Three.js, React Three Fiber
- **Backend & APIs:** Node.js, Express.js, Django, GraphQL, REST APIs, Prisma ORM
- **Databases & Cloud:** PostgreSQL, MongoDB, Firebase, Supabase

EDUCATION

Manipal University Jaipur

B.Tech in Information Technology

Jaipur, India

2023 – 2027
