EXPERIENCE

Bytehint - MERN Stack Intern

Nov 2025 - Feb 2026

- Translated complex Figma workflows into production-grade Next.js interfaces with strong responsiveness, accessibility, and UI consistency
- Built and optimized Electron desktop application interfaces, improving rendering performance and frontend usability
- Worked across frontend and backend integrations for production systems used by 100k+ users
- Improved frontend reliability and testing workflows across eCommerce and desktop application modules

Code Help - Full Stack Developer Intern

Aug 2025 - Nov 2025

- Worked on frontend revamp and backend integrations for a large-scale edtech platform using Next.js and TypeScript
- Built scalable frontend architecture patterns and reusable component systems improving maintainability across features
- Integrated GraphQL APIs with optimized Apollo query workflows reducing over-fetching and improving client performance

Astraea Solutions – Product Tech Intern

Jun 2025 – Aug 2025

- Built platform features for a CyberRange cybersecurity training system using Django and API-driven frontend workflows
- Developed LMS dashboards with Next.js + TypeScript supporting real-time progress tracking and scalable UI architecture
- Designed reusable frontend systems and data-driven UX flows improving usability across training modules

Arkcore - Frontend Developer Intern

APR 2025 - AUG 2025

- Worked in a 3-member engineering team building a SaaS platform frontend using Next.js and Tailwind CSS
- Developed reusable component systems and scalable frontend workflows accelerating feature development
- Built the company website with Next.js + Strapi CMS including SEO infrastructure and dynamic blog systems

PROJECTS

ZAxis - Minimal 3D Components Library

Live

- Built a production-ready 3D UI component library for modern frontend applications
- Developed customizable interactive 3D components including loaders, cards, and animated UI systems

LocalGov – AI-powered Legal Explainer

Live

- Built an AI platform converting complex government and legal policies into simplified user-friendly explanations
- Implemented SSR and caching workflows reducing API costs by ~30%

MetaMorpher – Web-based Multimedia Conversion Tool

Live

- Engineered a browser-native multimedia processing platform running fully client-side without server uploads
- Built file conversion workflows supporting image, video, and audio processing using FFmpeg.wasm

GearOne Mobile App

Playstore [Link](#)

- Built and shipped the complete mobile application ecosystem including the React Native app, backend infrastructure, admin panel, and tracking systems
- Developed scalable API workflows, authentication systems, order management flows, and real-time operational dashboards
- Integrated Razorpay payment systems and handled Android/iOS production deployment workflows end-to-end
- Engineered responsive cross-platform UI architecture with focus on scalability, performance optimization, and maintainable frontend systems

SKILLS

- Frontend:** React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, GSAP, Framer Motion, Three.js, React Three Fiber, React Native
- Backend & APIs:** Node.js, Express.js, Django, GraphQL, REST APIs, Prisma ORM
- Databases & Cloud:** PostgreSQL, MongoDB, Firebase, Supabase

EDUCATION

Manipal University Jaipur

B.Tech in Information Technology

Jaipur, India

2023 – 2027
